

**Reach Your
Perfect Temperature.
Every Time.**

We understand the importance of precise temperature control, and we help companies like you find the best solution for your manufacturing process.

**INDUSTRIAL
OVERVIEW**

hydro 
THERMAL®

OUTDATED EQUIPMENT

- You find yourself with inefficient equipment that has outlasted multiple generations without any upgrades.

NOT KEEPING CONSISTENT TEMPERATURE

- Your process equipment is failing to reach and keep an accurate temperature, crucial for a precise process.
- With your output consistently failing to meet specifications, both product and time are wasted, costing money and time that could go towards necessary upgrades.

STAFF TURNOVER = KNOWLEDGE LOSS

- Running your current equipment can be frustrating and confusing, factors made worse through consistent staff turnover

“The fluids in our plant are not currently being heated to an exact temperature, sometimes not hitting target temperature or we’re overheating to ensure that your minimum temperature is achieved.

Plus, with how old our equipment is, our staff does not always know what it takes to get back to running, slowing down our process even further.”

YOU ARE NOT ALONE.

Outdated equipment costs you time, money, and product.

Being in a constant state of repair makes your process inefficient, draining both your budget and your resources.

STOP WASTING TIME

You're spending too much of your day getting up to temperature or cleaning, fixing, and servicing your equipment - **it is time for a change.**

STOP TEMPERATURE FLUCTUATIONS

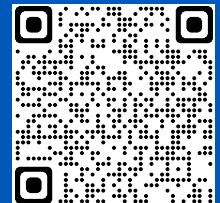

Underheating and overheating your product damages both your equipment and your reputation - **you need a better solution.**

STOP WASTING MONEY

Everyone wants to save money - take that next step towards making sure your process **stops wasting your time, energy, and money.**

HOW WE HELP

SCAN
ME

PRECISE TEMPERATURE

Not only will your process hit its desired temperature, it will hold at that temperature for as long as needed, eliminating any fluctuations.

WORRY-FREE MAINTENANCE

Set it and forget it - **Direct Steam Injection (DSI)** technology from Hydro-Thermal is built for even the most rugged Industrial applications and processes.

SOLUTIONS THAT PAY FOR THEMSELVES

Bet your bottom dollar on it. Let us show you just how efficient our technology is - visit our **Energy Savings Calculator** to compare how much money you can save.

ABOUT US

You need a partner that provides the most in both quality & reliability - and gives you the service you deserve. With 85+ years of experience across a wide range of industries, it has given us a unique insight into how to meet your needs.

We are proud to work with companies of all sizes and industries to help solve their problems.

Our service offerings set us apart. Behind every installation, you have a dedicated Service Team to support your needs. Our commitment to reliability and quality has you covered.

Our advanced manufacturing capabilities ensure all products are made in the USA and in an ISO-certified facility, providing you with an extra layer for your peace of mind.

WHAT YOU NEED TO GET STARTED:

Your current System Design (P&ID if available)

Your Product/Fluid properties

Your Process Conditions

Know your steam supply – gotta have steam!

IN TURN, YOU'LL RECEIVE:

Solutions Designed & Engineered for You

Nothing is cookie-cutter about Hydro-Thermal - we deliver solutions based on your needs, applications, and desired results.

Service You Deserve

We manage the details when it comes to scheduling product installation & training, preventative maintenance, replacement parts, and more.

Trial & Test Options

On the fence? Our Product Demonstration Lab is the perfect next step to trial one of our turnkey skidded solutions. Visit our Lab to see our products in action.

PERFORMANCE GUARANTEE

Confidence

100% performance guarantee gives you peace of mind that our products will perform as specified by YOUR application.
